

Lesson # 1 Worksheet

1. How are plants' needs different from humans' needs? How are they similar?

2. What are some different types of plants? How are they different from each other?

3. What are some questions you have about insects, plants, people, and the ways they interact?

4. Talk about a time you've seen an insect on a plant. What the insect doing? What part of the plant was it on? Draw a picture in the space below.

5. How are plants a part of your life? In what ways do insects and plants interact? On the back of this paper, draw a picture, graphic organizer, or diagram of how people, insects, and plants interact.
